

DECORATIVE FLAKE FLOORING

EPOXY BASED COATING (Vinyl Chip)

** Different Flake Chip Colour Combinations Available

Where to Use

- Restaurant and cafeteria seating areas.
- Commercial kitchen and food preparation areas.
- Grocery, department and retail stores.
- Light to medium duty production areas.
- Pharmaceutical laboratories, production rooms and offices.
- Hospitals, laboratories and health care facilities.
- Museums and galleries.
- Commercial lobbies and office areas.
- Animal shelters and veterinary clinics.

Basic Methodology

- 1 Mechanically prepare concrete – repair surface imperfections if necessary.
- 2 Apply 1-2 Coats of 100% solids **Sikafloor® 161** epoxy primer (depending on concrete porosity)
- 3 Apply 1 Coat of 100% solids **Sikafloor® 264** epoxy high build coating (roller applied)
- 4 Apply the desired coloured flakes to excess and allow to dry. Remove the unbonded flakes. Apply 2 Coats of 100% solids **Sikafloor® 169** UV stabilised clear coating (roller applied).
